

MFS® Variable Insurance Trust III – MFS® Mid Cap Value Portfolio

MFS® Mid Cap Value Portfolio

Information as of 06/30/2021

Description:

The investment objective of the MFS® Mid Cap Value Portfolio is to seek capital appreciation. This fund invests in mid-cap companies with attractive valuations and high quality fundamentals or significant potential for improvement. Targets solid balance sheets and resilient business models. Leverages MFS' bottom-up, global research platform to try and identify undervalued, high quality companies that generally: have solid balance sheets, resilient business models, scope for improving returns, capital investment discipline, and prospectus of beneficial capital deployment. This is an aggressive investment.

Fund composition

N/A

Beta: 0.98 (10 year)

Beta definition:

Beta provides a measure of a stock or fund's volatility relative to the market. The market is often defined by a certain benchmark, index or market average. The market's beta is 1. If a stock or fund is more volatile than the market, its beta will be higher than 1. If it is less volatile, the beta will be below 1. An investment that has a beta of 1.25 is believed to be more volatile than its market benchmark. For example, if the benchmark dropped 1 percent, then an investment with a beta of 1.25 is predicted to drop 1.25 percent. Remember, investment returns and principal value will fluctuate, so the value of your account, when redeemed, may be more or less than your original cost.

Benchmark: Russell Midcap® Value Index
