

MFS® Blended Research Small Cap Equity Portfolio

MFS® Blended Research Small Cap Equity Portfolio

This fund is only available in the Personal Retirement Planner Deferred Variable Annuity.
Information as of 06/30/2019

Description:

The investment objective of the MFS® VIT III Blended Research Small Cap Equity Portfolio is to seek capital appreciation. The disciplined small cap core approach combines two sources of MFS research, fundamental and quantitative, seeking reasonably priced, high-quality small-cap companies with a catalyst that may positively impact the stock price. This is an aggressive investment.

Fund composition

N/A

Beta: .94 (10 year)

Beta definition:

Beta provides a measure of a stock or fund's volatility relative to the market. The market is often defined by a certain benchmark, index or market average. The market's beta is 1. If a stock or fund is more volatile than the market, its beta will be higher than 1. If it is less volatile, the beta will be below 1. An investment that has a beta of 1.25 is believed to be more volatile than its market benchmark. For example, if the benchmark dropped 1 percent, then an investment with a beta of 1.25 is predicted to drop 1.25 percent. Remember, investment returns and principal value will fluctuate, so the value of your account, when redeemed, may be more or less than your original cost.

Benchmark: Russell 2000® Index
